01 - THE REALITY

You do the work. They get the *credit.*

Program managers hold everything together — stakeholders, timelines, blockers, reports, meetings. You're the glue. But "glue" rarely gets promoted or paid more.

"The people who get promoted aren't always the best workers — they're the most visible ones."

- **Too busy executing** to build visibility upward
- **Not enough bandwidth** for strategic thinking
- **No time** to document wins and quantify impact
- **Salary stays flat** even as responsibilities grow
